EXPERIENCE

Dashloc — Software Engineering Intern

Apr 2026 – Jun 2026  [Offer Letter](#)

- Built 25+ reusable UI components with **Vue.js 3** and **Nuxt.js**, reducing duplicated implementation by 40% and accelerating feature delivery across dashboards.
- Optimized frontend performance via lazy loading, auto-imports, and code splitting, cutting initial load time by 35% and improving responsiveness.
- Integrated RESTful APIs with robust error-handling and caching; collaborated in Agile sprints, code reviews, and technical documentation.

EDUCATION

Indian Institute of Technology Madras

 ID

B.S. in Data Science and Applications

Immediately available for full-time internships/FTE; open to onsite roles and eager to take on challenging, impactful work.

PROJECTS

Date Dev — Full Stack Developer Networking Platform

[Live Link](#) [Backend](#) [Frontend](#) 2026

- Built a full-stack platform with **React**, **Redux Toolkit**, **Node.js**, **Express.js**, **MongoDB**, and **Tailwind CSS**, following MVC architecture with production-grade modular code.
- Implemented **JWT authentication**, role-based access control, and optimized MongoDB queries using compound indexes and aggregation pipelines for efficient data retrieval.
- Integrated **Razorpay payment gateway** for subscriptions with webhook handling; engineered real-time chat and notifications using **WebSockets (Socket.IO)**.
- Automated scheduled email reminders for pending connection requests using cron jobs with **BullMQ** and **Redis**; currently building an **LLM-powered Developer Matchmaking Engine** for semantic profile analysis, compatibility scoring, and personalized collaboration recommendations.

PharmaGuard — AI-Powered Pharmacogenomic Risk Prediction Platform

[Live Link](#) [GitHub](#)

- Developed **PharmaGuard**, an AI-powered VCF analysis platform that predicts drug metabolism phenotypes and pharmacogenomic risks to help clinicians and patients prevent adverse drug reactions through safer personalized medication.
- Built a responsive **React/TypeScript** and **Tailwind/shadcn** interface with **TanStack Query** and **Recharts**, integrating AI-driven risk scoring to translate genetic variants into clear, actionable medication-risk insights.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, Python

Frontend: React.js, Redux Toolkit, Context API, Tailwind CSS, Vue.js 3, Nuxt.js

Backend: Node.js, Express.js, REST APIs, JWT, WebSockets, Socket.IO

Database: MongoDB, Mongoose, PostgreSQL, SQL, Redis, BullMQ

AI/ML: RAG, LLM Integration

Software Engineering: OOP, MVC Architecture, Clean Code, Performance Optimization, DSA Problem Solving (300+ problems solved)

Tools & Others: Git, GitHub, Postman, VS Code, Problem Solving
